Our club is thinking about getting an AEA PK-900... but recently we've
heard some very negative comments from someone who says that it
doesn't work very well in operation.

I'm looking for comments on what other people think of it. Does it work
well for you, or have you had problems with it?

Thanks --

hi ed... mitch here in mobile, alabama... i have a pk-900, had it a few
months... in general, i like it... the modems are very good... weak
signal reception is excellent... better than my old pk-232 but not
quite as good as my dsp-2232... i have used it mostly on rtty, a little
on amtor/pactor, and with the internal 9600 baud modem, a lot on 9600 baud
packet... (it has the same software glitch on 9600 baud packet as the
dsp-2232 in trying to use it with the pg satellite software for uploading
to the pacsats)... on the negative side, it is LARGE, and is a power
hog, requiring 1.5 amps of 12v... and it is pricey, being in the
+/-450 bux range without the 9600 baud modem (abt 75 bux)...

mitch

Greetings:

I'm looking for recommendations for accesories for my HTX-202 HT:
primarily, a replacement 'rubber duck' antenna, and a good leather case.

There is a classified ad in the back of this month's CQ from an outfit called 'Advanced Specialties' in Lodi NJ listing HTX accessories, including a 'HD Leather Case twist release' - - anyone have any experience with this outfit or their products?

Thanks in advance,
Tom N3QKV
